OBJECTIVE

Full-Stack Software Developer and AI Engineer with experience building secure, scalable applications across Django, Flutter, Laravel, React Native, and PostgreSQL. Proficient in RESTful API design, payment integration (PayMongo/GCash, HMAC-SHA256 webhook security), Linux/VPS deployment, and CI/CD workflows. Experienced in production AI systems including RAG pipelines (pgvector, HNSW), n8n workflow automation, and Facebook Graph API integrations. Former GDSC Lead with a background in developer mentorship and technical workshops.

Professional Experience

AI Engineer/Developer

Apnea Dynamics Inc. [🔗](#)

03/2026 – Present
Pangalo, Bohol,
Philippines

- Built a production-grade RAG pipeline on Supabase, including section-aware document chunking (markdown ## + 500-token cap), vector embedding via text-embedding-3-small, Configured pgvector with HNSW indexing for fast approximate semantic search, using cosine similarity for text embedding retrieval, and Edge Functions for document ingestion and semantic search.
- Specialized in data pipeline design and optimization, ensuring scalable and efficient data flow.
- Developed AI-powered workflows using n8n, automating complex business processes and integrations.
- Implemented Facebook Graph API integration for advanced social data handling and analytics.
- Built data scraping and automation solutions with Apify, streamlining data collection at scale.
- Experienced with Flutterflow development, focusing on secure OAuth2 authentication flows.
- Designed and deployed a Payroll calculator and system, improving accuracy and compliance in payroll management.

Full-Stack Developer Lead

MedSync Digital Technologies Incorporation

07/2025 – Present
Tagbilaran City,
Philippines

- Developed RESTful APIs using Python Django + DRF, implementing JWT authentication, role-based access, and modules for Patients, Doctors, and Admins.
- Utilized Flutter to build cross-platform apps (IOS TestFlight App submission via Codemagic CI/CD, Web, Android, Desktop) integrated with Django APIs.
- Integrated PayMongo payment processing (GCash checkout, webhook verification with HMAC-SHA256, idempotency handling) into both Django backend and Flutter frontend.

- Managed PostgreSQL databases via pgAdmin 4, handling migrations, queries, and indexing.
- Deployed production-ready builds on DigitalOcean Droplet (VPS) with Linux, SSH, Nginx, Redis, Channels, Daphne and Gunicorn configurations.
- Used GitHub for version control, following Git workflow for collaborative branching and merging.
- Authored codebase documentation and maintained API integration guides for development clarity.
- Led the end-to-end development of MedSync, a medical platform that enables patients and doctors to manage digital health records through a mobile-first ecosystem.

Backend Developer - Intern

Blenditoto Corporation

02/2025 – 05/2025

Tagbilaran City,
Philippines

- Developed RESTful APIs with features including authentication, third-party API integration, and endpoint provisioning.
- Applied MVC architecture principles throughout the project.
- Experience on Google APIs.
- Contributed to a production-ready backend system during internship.
- Documented API endpoints using POSTMAN.
- Utilized GitHub for version control and team review.

Projects

Document Q&A Assistant

05/2026

Ask questions about your uploaded documents using retrieval-augmented generation (RAG) powered by OpenAI GPT and pgvector semantic search.

- Built document ingestion pipeline with automatic text chunking and vector embedding via OpenAI's embedding model
- Implemented pgvector semantic search with cosine similarity for context retrieval, feeding results into GPT for responses
- Deployed embedding generation and chat completion as Supabase Edge Functions (Deno runtime)
- Secured with Supabase Auth (email/password) and row-level security ensuring users only access their own documents

MentalHelp

12/2024 – 05/2025

Capstone Project at Holy Name University

Developed a full stack website and application for Holy Name University using Next.js, React Native along with using PostgreSQL. Deployed in Vercel and the .apk file can be downloaded on an Expo Go link.

Features of the system includes:

- Rule-based AI chatbot which contextualizes basic personal information
- Appointment System
- Real-time messages and notifications
- Dashboard Analytics and Reports
- Authentication and authorization

Personal Daily Command Center — Personal Project

11/2025

A self-use life dashboard for tracking tasks, habits, expenses, notes, and mood in one interface.

- Built with Next.js 15 (App Router), TypeScript, Tailwind CSS, and ShadCN UI
- Used Prisma ORM with PostgreSQL for data persistence and Zod for schema validation
- Secured with Clerk authentication and server-side actions for backend logic
- Deployed on Vercel with a custom domain via Hostinger

SKILLS

Technical Skills

Languages: Python, TypeScript, JavaScript, Dart, PHP, C Frameworks & Libraries: Django, Django REST Framework, Next.js, Laravel, Flutter, React Native
AI & Data: Vector Embeddings & Semantic Search, n8n Workflow Automation, Supabase pgvector
Databases & Infra: PostgreSQL, Supabase (Edge Functions, RLS), DigitalOcean (VPS), Linux, SSH
Payments & Integrations: PayMongo (GCash Checkout, Webhooks, HMAC-SHA256 Verification)
Practices & Tools: RESTful API Design, CI/CD Workflows, OOP, GitHub, HTML, CSS

Soft Skills

Communication, Leadership, Planning, Teamwork, Problem-solving, Critical Thinking, Adaptability, Time Management, Initiative, Project Ownership, Client Collaboration, Self-Management, Continuous Learning

EDUCATION

Cum Laude-Bachelor of Science in Information Technology

Holy Name University
General Weighted Average (GWA): 1.4

Tagbilaran City, Bohol, Philippines

With Honors-ICT Strand

Tagbilaran City Science High School

Tagbilaran City, Bohol, Philippines

COMPETITIONS

Philippine Startup Challenge 9 (DICT PH)

BEST PITCH PRESENTER, 4TH PLACE
Cebu
Contribution: Leader

09/2024

AI.deas for Impact: AI for Innovation and Social Impact Workshop (DICT PH)

CHAMPION
Dumaguete

05/2024

Contribution: Leader

Igniting Innovation: An Introduction to Technopreneurship

03/2024

CHAMPION

Holy Name University

Contribution: Leader

Google Developer Student Clubs Solution Challenge

12/2023

Participant

Global

Contribution: Leader, Programmer

Google Developer Student Clubs Solution Challenge

12/2022

Participant

Global

Contribution: Leader, Programmer

LEADERSHIP EXPERIENCE

Google Developer Student Clubs - Holy Name University

2023 – 2024

President

- Organized 6 events at GDSC-HNU with an average of 70+ participants from 2023 to 2022, served as a speaker at schools, participated in over 10 events, and formed 20+ organizational partnerships

Google Developer Student Clubs - Holy Name University

2022 – 2023

Assistant Programmer

- Helped in organizing, preparing the learning materials and being a speaker on technical and programming events.

College of Engineering and Computer Studies - Local Government Unit

2022 – 2023

2nd Year Representative

- Assisted a lot of school activities, in charge of various areas such as answering inquiries, front-desk related roles, being the assistant secretary, assistant PIO, Traveling to various locations in response to a request and lastly, acquiring participants / volunteers to some events.

SEMINARS/SPECIAL TRAINING

Google Developer Student Clubs (GDSC PH) Summit PH

10/2023

Gathering of all 42 GDSC Chapter Leads of the Philippines

Manila

Holynamian Student Leadership Summit

08/2023

Gathering of different student leaders at different school organizations

Tagbilaran

Holy Name University Central Student Government Lead Camp

08/2023

Gathering of all officers in the Central Student Government, the governing body of the Holy Name University, College Department.

Tagbilaran
